## “2025 Rules Reboot Package”!

*We often find ourselves in lengthy debates over procedural rules and unclear bylaws. These pull us away from the mission that unites us. That’s why I’ve worked diligently to prepare a comprehensive reboot of our party’s bylaws. This package makes the rules easier to understand, simpler to follow, and more effective for everyone.*

### ***Clarity and Accessibility***

Our current bylaws are a tangled web of rules, scattered across various sections in a way that can confuse even the most experienced members. The Rules Reboot reorganizes everything by topic.

### ***Eliminating Duplication and Contradictions***

Many of the same provisions appear in multiple sections, often worded differently. The reboot package consolidates related rules into single, coherent sections, and removes any identical duplicates.

### ***Simplification Without Changing Intent***

The reboot process preserves the original intent of every rule. Every change has been documented to ensure that nothing substantial has been altered. Grammatical errors have been corrected, ambiguous wording has been clarified, and redundancies have been removed.

### ***Focusing on What Really Matters***

With clearer, more accessible rules, we can spend less time arguing and empower every member to participate, without getting lost in unnecessary complexity.

### ***Transparency Every Step of the Way***

I’ve provided detailed documentation showing exactly how the revised bylaws were created. Every step of the process is available for review at [sites.google.com/view/2025-rules-reboot/files](https://sites.google.com/view/2025-rules-reboot/files)

### ***A Stronger, More United Party***

Clear and concise bylaws will help us work together more effectively, resolve disputes quickly, and stay focused on our shared mission.
